ABOUT ME

I am a software Engineering and Web Development student with a strong interest in designing and developing responsive, user-friendly web applications. I have knowledge of JavaScript, HTML5, CSS3, MongoDB, Java, and Python programming, and I enjoy solving problems through clean and efficient code. I am eager to explore new technologies and improve my technical skills through hands-on projects. I work well both independently and in a team and My goal is to build innovative software solutions while gaining practical experience and growing as a software developer.

EDUCATION

DIPLOMA IN COMPUTER ENGINEERING	2024-2026	12TH HSC BOARD	2023-2024
Government polytechnic Mumbai, Percentage 2nd year : 60		- Science Stream (PCM) - Guru Nanak Khalsa College of Arts, Science and Commerce : 64.33%	

PROJECT

students management system	2025-NOW
The Student Management System is a web-based application designed to simplify the management of student records. It allows users to add, update, view, and delete student information efficiently. The system helps organize academic data, improves record accuracy, and reduces manual paperwork. It provides an easy-to-use interface for managing student details, making administrative tasks faster and more efficient.	

SKILLS

HTML	CSS	JavaScript
MongoDB	Java	Python
